R3000LG-OG robustOS

IP67 Outdoor LoRaWAN Gateway
Cost-effective 8 channel Gateway with advanced features

INTRODUCTION

Robustel R3000 LG-OG is an IP67 outdoor LoRaWAN gateway with a myriad of advanced features not usually found on such devices. Unique features include:

Smart Roaming – Unique network selection algorithm for intelligent network selection when using 3G/4G backhaul with roaming SIMs – gives highest possible resilience

RobustVPN – make easy inbound connections to Robustel Gateways on ANY SIM or on any broadband connection. No fixed IP of DynDNS services required

Built-in LNS – Optional built-in LoRaWAN Network Server for applications that require local processing of network data – minimizes network traffic
The R3000LG-OG is based on Robustel's best-selling router, the R3000. With many tens of thousands being sold annually, Robustel can achieve economies of scale on the R3000 series as a whole that many peers in the IoT market cannot reach. For this reason, Robustel can offer a very stable, industrial designed outdoor LoRa gateway at very attractive prices.

All of the latest models support Global LTE (4G) communications by virtue of the adoption of the latest Global cellular module technology.
