OVERVIEW

For Strict Hygiene Requirements

With stainless steel housing and IP69K protection for dust and water resistance, this Panel PC is ready for high-pressure, high-temperature washdowns regularly. The Panel PCs are designed for industries that require stringent disinfection processes and splashing cleanup routines found in Food, Beverage, and Chemical applications.

Extra Protection with Conduit Pipe

Never worry about exposed cables again. The custom-built waterproof conduit pipe is pre-installed to give an additional layer of protection for any peripheral cables connected to the device. The protection grants increased product longevity to reduce downtime in the production facilities.

Projected Capacitive Touchscreen

The highly-sensitive touch screen and PCAP multi-touch support make it easy for users to key in data, rotate images, drag and drop files, and zoom in with two or more fingers.
