

10.4" Industrial Monitors
DuraVision[®]
FDX1003 / FDX1003T

Highly Durable 10.4" Industrial Monitors with High Brightness and Multiple Mounting Options

Flexible Installation

To meet the requirements of different industrial installations, the monitors are available in four configurations – desktop, VESA mount, panel mount, and chassis.

High Brightness for Visibility

The maximum brightness of 600 cd/m² (460 cd/m² for the FDX1003T) ensures excellent screen visibility in bright ambient environments. The brightness is adjustable to as low as 0.5 cd/m², making them easy to view in low ambient lighting conditions.

Durable Build

Both monitors can withstand temperatures ranging from 0 - 50°C for high durability in industrial environments. In addition, the cabinets do not contain any ventilation holes and the perimeter of the control buttons are sealed, making them impervious to liquids and dust.

Touch Panel Variation

The FDX1003T is equipped with an analog resistive touch panel that has a minimum touch life of 10 million touches. It accepts touch input from both bare and gloved hands as well as styluses. It is also more resistant to dust and water compared to other touch technologies for increased durability.

Flexible Positioning

The monitors are built to operate in both standard horizontal positions and non-standard positions such as attached to a mounting device or tilted at an extreme angle. In addition, images can be viewed rotated at 180° using a function accessed via the monitor's front buttons for viewing flexibility.

Additional Features

- D-Sub mini 15 pin analog input
- DVI-D 24 pin digital input
- Key lock support
- 2-year, 24 hour use manufacturer's warranty
