

Businesses no longer just need large size displays, they often also need smaller displays for a variety of environments and uses. Samsung's QB13R / QB13R-T small display enables personalized and more impactful communication through its compact and versatile design. An all-in-one solution designed for professional use, the display improves the operational efficiency of content, while also ensuring reliable performance for any business use. The QB13R-T specifically, is a touch-enabled small display which provides a unique store experience and improves customer engagement.

Highlights

- 13" FHD, non-glare display delivering clear content.
- Compact and slim design enabling efficient use of space.
- Embedded MagicINFO S player to support seamless content playback.
- Rigid 3-layered Knox security system preventing any unauthorized access.
- Center IR and built-in Wi-Fi allowing convenient remote device control and management.
- EMC Class B and IP5x rating to ensure safe and reliable operation.

SAMSUNG

Industry trend

As creating differentiated brick-and-mortar locations continues to increase in popularity, providing a unique in-store experience is critically important for elevating a brand and driving sales. Therefore, businesses are finding new and effective ways to engage customers by making the most of every customer touch point. That means small sized displays are being adapted as common tools within various environments. More personalized, intimate content can reach the right audience at optimal points in time, increasing engagement and sales opportunities. Efficient content management and reliable performance ensure businesses can operate the displays without any hassle.

Introducing Samsung Small Displays

Samsung is introducing the two latest versatile, small sized displays, the QB13R and touch-enabled QB13R-T. Designed for professional use, Samsung's QB13R Series delivers clear content using the embedded MagicINFO S media player, supported by reliable 16/7 operation and industry standard certification to ensure safe operation, reliable performance and eliminate any hassle.

QB13R: Small Display

The QB13R, FHD resolution display delivers clear and vibrant content, all in a slim and compact design. It can easily be applied to any business environment, such as a tool to display schedules, information and promotions in corporate lobbies, elevators and in front of meeting rooms and classrooms. To engage customers more directly, the QB13R can also be used as a store shelf display to promote a specific or targeted item, in addition to showing promotions at the point of sale (POS) or counter.

QB13R-T : Touch Display

With integrated capacitive touch functionality, the QB13R-T provides a user-friendly experience. Its 10-point multi-touch and fast response time powers an intuitive interface that allows for customer-driven search and action. QB13R-T is optimized for any interaction opportunities such as health-care, check-in at the gym, an automotive showroom, as well as any retail or restaurant environment where businesses would want to offer a personalized service while also acquiring customer data.

Key features

Crisp and visible content

The display supports 1920x1080 FHD resolution, displaying crisp and easy-to-read content. This is enhanced by a non-glare panel which always delivers clear content in any ambient light. These innovative features are supported by reliable 16/7 operation, suitable for professional use.

Powerful content playback

With an embedded MagicINFO S player, backed by TIZEN, the QB13R allows efficient and seamless playback without any external media player. SSSP also allows easy content development through reinforced compatibility with multiple web formats.

Convenient, clean display control

With center IR, each display receives IR signals direct to the panel, allowing easy and convenient remote control even with a tailored installation. When mounted, display doesn't require an IR receiver cabling extension. Built-in Wi-Fi allows wireless remote management for both content and display.

Slim, smart design

The compact and slim design of the QB13R allows for efficient space utilization, even in compact locations. A sleek back design makes the display optimal for both wall mounting or simply standing, while the connectivity, content play and device controls are easy to operate.

Comprehensive security setup

The powerful Knox security system provides rigid, three-layer security, offering airtight protection at the application, platform and system level, while restricting access to content and hardware. In addition, remote control of the network and USB ports prevents any unauthorized access.

Safe operation, reliable performance

The QB13R is electromagnetic compatibility (EMC) class B compliant, meeting strict safety and reliability standards for operation. Additionally, IP5x rating ensures durable performance even in dusty environments.
