

PCIe-COM232-8 PCIe-COM232-4 PCI Express Multi-Port Low Profile Serial Communication Cards

FEATURES

- Eight or four-port PCI Express RS-232 serial communication cards
- Low profile PCIe MD1 form factor, MD1 defines the shortest standard card length available
- High performance 16C950 class UARTs with 128-byte FIFO for each TX and RX
- Supports data communication speeds up to 921.6kbps (standard model 460.8kbps)
- +/-15kV ESD protection on all signal pins
- Supports 9-bit data mode
- Full modem control signals
- Software compatible with all operating systems
- Plug and Play, no jumpers to configure
- 3' breakout cable included, terminating with industry-standard DB9M connectors (no external breakout box required)

FACTORY OPTIONS

- Connector strengthening bracket for secure and fail-proof cable connections
- Extended temperature operation (-40°C to +85°C)
- High-speed version up to 921.6kbps
- RoHS compliant version
- Remote wake-up enable
- Low profile bracket installed for small, embedded PCs

FUNCTIONAL DESCRIPTION

ACCES I/O's PCI Express multi-port serial communication cards deliver eight (PCIe-COM232-8) or four (PCIe-COM232-4), high-speed RS-232 ports for use in a wide variety of applications. The cards were designed to offer serial compatibility with the PCI Express bus and to be used by system integrators and manufacturers in the design of industrial and commercial systems. Each RS-232 port is capable of supporting data rates up to 921.6kbps and implements full modem control signals to ensure compatibility with a broad variety of serial devices. Existing serial peripherals can connect directly to the industry standard DB9M connectors which are provided on the breakout cable that ships with each card. The card features a x1 lane PCI Express connector which can be used in any available x1, x2, x4, x8, x12, or x16 PCI Express expansion slot.

The card is 4.7 inches in length and 2.2 inches seated height and complies with the MD1 Low Profile Form Factor specifications (the smallest PCI Express card available). Low profile PCI Express allows the design of small footprint, low profile systems while still offering expandability and upgradeability to the end user. A regular profile mounting bracket is installed for use in standard size computers, while an optional low profile bracket is provided for smaller systems which require the use of low profile PCI Express cards.

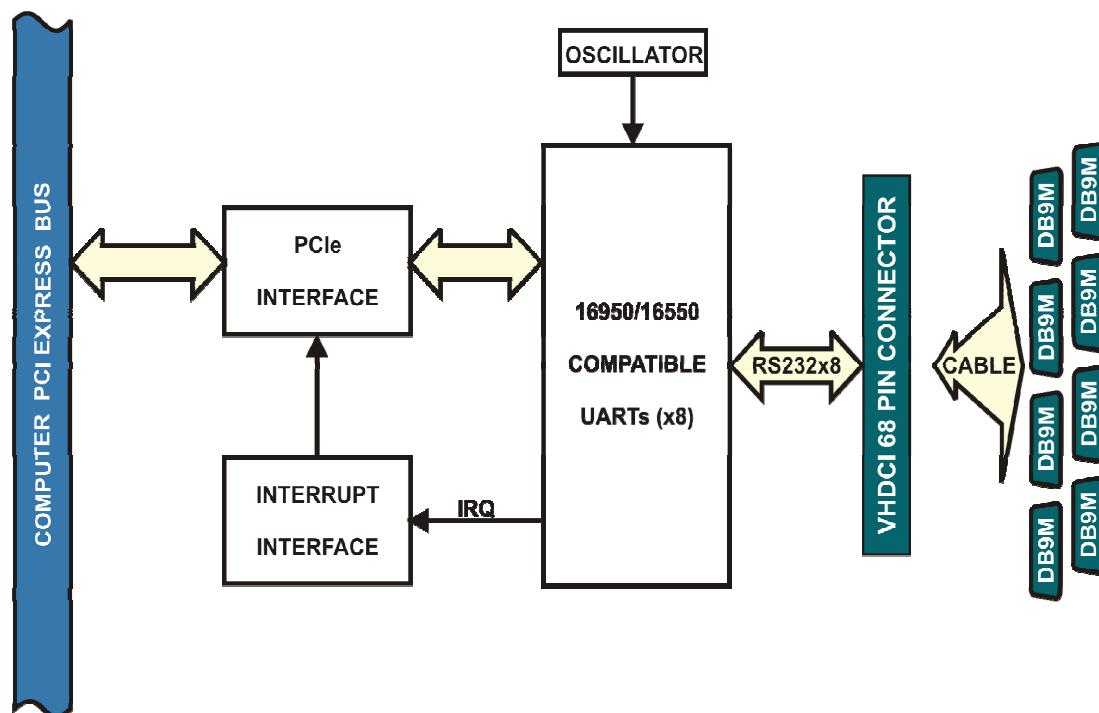

Available accessories include a broad range of cables, screw terminal boards and breakout connection boxes for a variety of quick and easy connectivity options.

SPECIAL ORDER

Please contact ACCES with your precise requirement. Other examples of special orders would be conformal coating, custom software, RJ45 connectivity, special breakout boxes, etc... we will work with you to provide exactly what is required.

SOFTWARE

A complete driver support package is provided including an easy-to-use Windows terminal program for testing your COM ports. This simplifies the verification of proper COM port operation. The card installs as standard COM ports in all operating systems including DOS, Linux (including Mac OS X) and 32-bit & 64-bit Windows.

BLOCK DIAGRAM

SPECIFICATIONS

Communications Interface

I/O connection: VHDCI 68 pin SCSI connector
 Serial ports: 8 RS-232 ports
 Serial data rates: 460.8k baud (up to 921.6k) asynchronous
 UART: Octal type 16C950 with 128-byte transmit & receive FIFO, 16C550 compliant
 ESD Protection: ±15kV on all signal pins
 Character length: 5, 6, 7, or 8 bits
 Parity: Even, Odd, None, Space, Mark
 Stop interval: 1, 1.5, or 2 bits
 Flow Control: RTS/CTS and/or DSR/DTR, Xon/Xoff
 Cable: 3' shielded breakout cable terminated with 8 male D-sub 9-pin connectors

Environmental

Operating temp.: Commercial: 0°C to +70°C
 Industrial: -40°C to +85°C
 Storage temp.: -65°C to +150°C
 Humidity: 5% to 95%, non-condensing
 Power required: +3.3VDC @ 0.9W (typical)
 Size: 4.72 inches long x 2.20 inches high (120 mm long x 55.8 mm high)

DB-9 Male

1	2	3	4	5
DCD	RX	TX	DTR	GND

6	7	8	9
DSR	RTS	CTS	RI

ORDERING GUIDE

PCIe-COM232-8 PCI Express eight-port RS-232 serial card with 3' DB9M breakout cable
 PCIe-COM232-8NC PCI Express eight-port RS-232 serial card without cable
 PCIe-COM232-4 PCI Express four-port RS-232 serial card with 3' DB9M breakout cable
 PCIe-COM232-4NC PCI Express four-port RS-232 serial card without cable

Model Options

- F Fast version (up to 921.6kbps)
- T Ext. temp. operation (-40° to +85°C)
- RoHS RoHS compliant version
- W Remote wake-up enable
- L Low profile bracket installed

Accessories

BRKT-551-SCB Connector stabilizer bracket (use with standard height PCIe bracket only)
 ADAP9 Screw terminal adaptor (single DB9 female to 9 screw terminals)
 ADAP9-2 Screw terminal adaptor (dual DB9 female to 18 screw terminals)

Assured Systems

Assured Systems is a leading technology company with over 1,500 regular clients in 80 countries, deploying over 85,000 systems to a diverse customer base in 12 years of business. We offer high-quality and innovative rugged computing, display, networking and data collection solutions to the embedded, industrial, and digital-out-of-home market sectors.
