Introduction

The 10.4-inch GOT810-316 is specially designed for food processing applications. Its IP66-rated stainless steel housing protects entire system from damage of water, powder, and dust. It also supports a wide operating temperature range from 0°C to +50°C. This robust unit is specifically designed for food processing applications.

Full IP66 and IP69K Compliance

The GOT810-316 adopts a water/dust-proof housing design with five IP66-rated M12 I/O connectors and IP69K compliance that ensures the product's ability to resist ingress of high temperature and high pressure water. It passed entire system IP66 test by SGS, and verified salt mist test. Additionally, it was tested by a spray nozzle with high temperature water (+80°C), a flow rate of 14 to 16 L/min and a nozzle hold with distance 10 to 15 cm away from the device at angles of 0°, 30°, 60° and 90° for 30 seconds. The GOT810-316 is qualified to meet harsh-environment applications.
