Patented CDS Technology

Convertible Display System (CDS), the patented technology that connects the CV-100 display module to the P1201 embedded computer, has the advantages of easy maintenance in the field and easy future upgrades because the screen size can be changed and performance can be improved by only replacing a single part, rather than the whole system, saving on upgrade costs.

Comprehensive Range of Sizes

The CV-100/P1201 series has a diverse selection of screen sizes (8.4" to 24"), aspect ratios (4:3, 5:4, 16:9), and touch technologies (multi-point capacitive, single-point resistive) available to suit various application needs.

Robust, Safe, Reliable

The CV-100/P1201 series has industrial-grade protections, including wide operating temperature (-20 to 70°C), wide-range DC power input (9 to 48 VDC), and IP65 front panel dust and water resistance, to face harsh and dangerous use environments such as on-site HMI and production process visualization. The CV-100/P1201 (19"-24" only) has separately passed product safety standards (UL certification) for information and communication technology and audio-visual equipment in the United States, an assurance of product safety.
